

EDUMETRICS

Academic Assessment & Analytics

A practical platform for Outcomes-Based Education, assessment management, outcomes tracking, accreditation evidence, and Continuous Quality Improvement.

ASSESSMENT MANAGEMENT

Standardized rubrics and direct evidence

OUTCOMES TRACKING

CLO, SLO and PLO visibility

CONTINUOUS QUALITY IMPROVEMENT

Evidence-driven action planning

PLATFORM BROCHURE

Turn academic data into clear, actionable evidence.

EduMetrics centralizes curriculum mapping, direct learning evaluation, performance tracking, and quality-improvement documentation in one academic assessment workflow.

Designed for:

Institutional Leadership & Deans
Department Chairs & Coordinators
Faculty & Instructors
Students

OBE • ASSESSMENT • CQI

PLATFORM OVERVIEW

Transform academic data into actionable insights

EduMetrics is an advanced academic assessment and analytics platform designed to empower educational institutions in implementing and managing Outcomes-Based Education (OBE). By centralizing curriculum mapping, direct learning evaluation, and historical performance tracking, EduMetrics turns complex institutional data into clear, actionable insights for academic accreditation and ongoing quality enhancement.

CORE PILLARS

01	Assessment Management Create standardized scoring rubrics, direct assignment matrices, and exam benchmark templates. Simplifies grading for faculty while supporting uniform evaluation standards across departments.
02	Outcomes Tracking Track performance across Course Learning Outcomes (CLOs), Student Learning Outcomes (SLOs), and Program Learning Outcomes (PLOs), with visibility into student mastery and institutional targets.
03	Continuous Quality Improvement Close the assessment loop by converting empirical evaluation performance into structured recommendations, departmental action plans, and measurable follow-up.

PARTICIPATING ROLES & RESPONSIBILITIES

Role	Key Capabilities & Access Level
Institutional Leadership & Deans	Access program-wide achievement metrics, audit cross-departmental alignment, review high-level accreditation reports, and approve CQI initiatives.
Department Chairs & Coordinators	Map curriculum matrices to institutional goals, oversee periodic assessment cycles, assign course learning targets, and lead departmental review meetings.
Faculty & Instructors	Input student evaluation grades via custom rubrics, monitor individual class progress, and generate term-end course outcome reflection reports.
Students	Track personal learning progression, view outcome-based grade breakdowns, and identify specific academic competencies for continuous improvement.

THE 5-STEP ASSESSMENT WORKFLOW

From curriculum alignment to measurable improvement

01

Curriculum Mapping & Alignment

Department heads configure program learning goals and align them with course offerings and regional accreditation standards.

02

Assessment Setup & Rubric Design

Instructors set up targeted assignments, projects, and examinations tied directly to specific course outcomes.

03

Data Collection & Scoring

Faculty grade coursework during active academic terms through intuitive, rubric-based evaluation interfaces.

04

Automated Analytics & Report Generation

EduMetrics aggregates student scores to calculate outcome mastery levels across classes, cohorts, and whole programs.

05

CQI Action Planning & Implementation

Academic stakeholders evaluate performance gaps, document corrective action plans, and track progress into subsequent academic cycles.

KEY BENEFITS FOR INSTITUTIONS

Accreditation Readiness

Streamlines compliance documentation by generating audit-ready reports for accrediting bodies.

Data-Driven Decision Making

Eliminates guesswork through transparent performance visualizations at every organizational level.

Time Efficiency

Reduces administrative work by automating manually calculated outcome spreadsheets and paper evaluation forms.

Secure Cloud Architecture

Supports secure storage and backup of institutional assessment records, student performance profiles, and historical trends.
